

Please do not allow cell phone usage on aircraft during flight. The aircraft is a confined area and can be extremely noisy with normal chatter, crying children and the general noise of the aircraft. Allowing cell phone usage will encourage people to talk even louder and disturb the passengers around them. A flight should be a pleasant experience but cell phone usage will aggravate and anger other passengers which could cause unwanted conflicts to occur in flight among passengers. The flight attendants have a difficult job to begin with, any practice that could result in passenger anger should not be permitted for the safety of everyone on board.
